Get the best from your floor for longer

- Create a healthy room climate with 40 - 60% relative humidity and a temperature of around 20 degrees.
- Protect your floor by placing protective mats in the entrance to the room in order to collect large particles of dirt immediately and stop them coming into contact with your floor at all.
- Place felt gliders underneath moveable furniture. Only use soft castors (EN 12529 Type W).
- Protect your floor by avoiding high point loads (i.e. high heels) and scratches (i.e. pet claws).
- If a warm water underfloor heating system is installed, the surface temperature must not exceed 29 degrees.
- Only use a brush, vacuum cleaner or moist, wrung-out cloth for cleaning. Do not use steam cleaner (212°F, 100°C). Avoid leaving water standing on the floor.
