The eco-floor with the spirit of wood

Laminate floor - Herringbone Edition

CLASSIC AND MODERN IN HARMONY

Living and shaping tradition

Magnificent castles, elegant city villas or charming old apartments – the herringbone pattern is reminiscent of past eras. The planks, laid at 90-degree angles, were already found in elegant Art Nouveau houses in the 19th century.

The longing for timeless elegance and comfortable flair means the format is making a comeback. The herringbone pattern is right on trend and lends a classic look to any interior.

In combination with modern style elements, it provides exciting contrasts. Hardly any other floor brings elegant lightness and at the same time traditional atmosphere into the room.

We at ter Hürne have reinterpreted the theme with our Herringbone Edition. We create products that you come into contact with every day. This informs our philosophy of equipping our floors with the best possible characteristics.

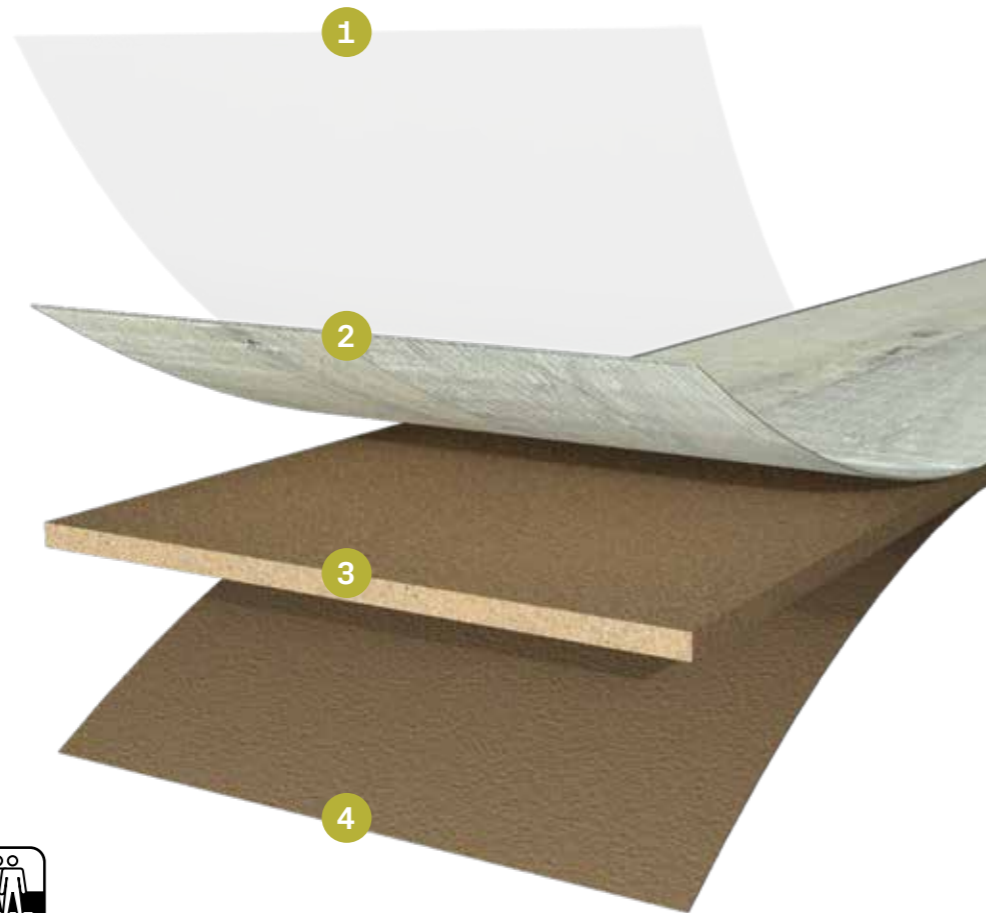

For us, this is not a trend, but an attitude: the good properties of wood have always been the benchmark for all products from ter Hürne – from the company's beginnings more than 60 years ago to the present day.

Wood remains our role model for smart, alternative materials for natural, healthy living.

PRODUCT INTELLIGENCE

Made smart

- 1 Surface sealant
- 2 Printed decor layer
- 3 HDF baseboard
- 4 Stabilising layer

* SmartConnect HB is the click connection for herringbone. Suitable for floating installations.
 ** Suitable for water-based and electric underfloor heating systems. Only suitable for electric surface hearing systems fitted with gentle warm-up technology and a control unit for automatic dew point regulation. Heating systems with reverse cycle cooling must be fitted with an automatic control unit for dew point regulation.
 *** Oak Couch House (1101021806) is not register embossed.

HEALTHY LIVING

So that you feel good

Laminate flooring consists almost entirely of wood and other organic materials. Each layer of the product structure contains healthy and sustainable components.

The healthy heart of the floor is its compacted baseboard made of wood fibers. This is stabilized from below by a backing that is also made of wood fibers. The surface of the laminate flooring consists of resin mixed with the natural mineral corundum.

ter Hürne laminate flooring contributes sustainably to a better climate balance in the same way as a parquet floor made of natural wood. One cubic meter of wood stores one ton of CO₂. This helps to reduce the CO₂ levels in our atmosphere. For the wood in the baseboards, we use trees from storm damage, among other things. These are thus put to good use and also continue to store CO₂.

Awards such as the Blue Angel and the eco certificate confirm that our laminate floors are low in emissions. We surpass the legal requirements for emission-free living demand. Our laminate floors are free of plasticizers and chlorine.

*Information sur le niveau d'émission de substances volatiles dans l'air intérieur, présentant un risque de toxicité par inhalation, sur une échelle de classe allant de A+ (très faibles émissions) à C (fortes émissions).

HERRINGBONE

For an elegant appearance

With the Herringbone Edition, we offer you nine decors in the elegant format 665x133x10 mm for a noble appearance. The oak decors provide a varied play of colors - the emphasis of the herringbone pattern is enhanced by the surrounding V-bevel. And the special feature: Do-it-yourselfers can easily install this impressive floor themselves thanks to the SmartConnect HB connection!

MY VIRTUAL FLOOR

My Room Studio

With our virtual Room Studio you can view all of our floors in your own home. Here and now. Just use your smartphone. As soon as you are in the Room Studio you have two options:

- 1 You can either take a picture of your room with your smartphone and select your preferred floor, which you lay virtually.
- 2 Or you can select room images from our gallery and virtually lay your preferred floor there.

With our virtual Room Studio you can look at all of our floors in the comfort of your own home either on your laptop, tablet or desktop computer. Due to the size of the display, this is sometimes the better alternative. Just click on the Room Studio button on the right-hand side of the screen.

*Insert your own room photo,
take out the old floor and
experience the new floor in
your own room!*
