## Your good decision for quality

As a German family-owned business from the Münster region, for over 60 years now we have dedicated ourselves to developing products that are sustainable and conducive to healthy living, while setting the highest standards in terms of function and aesthetics.

Taking nature as our example, we use our passion, expertise and flair for good design to create floors that bring together the latest designs and sophisticated technology combined with maximum resource efficiency for our shared environment. With every engineered hardwood flooring plank by ter Hürne you have at your feet something unique that is distinguished by its uncompromising quality. That makes the difference.

# Healthy Living

## You can breathe deeply with us

Engineered hardwood floors by ter Hürne are completely natural. They consist entirely of wood and are hand-finished with oils based on linseed and walnut oil. That guarantees you clean, uncontaminated indoor air and thus more well-being, health and ultimately quality of life for you and your family.

Every year independent testing institutes certify the compatibility of our production processes and products with healthy indoor living. They confirm that our engineered hardwood floors are particularly low in pollutants and emissions and are therefore healthy to live with.

## Guarantees for a healthy home environment

For over 30 years, the German Eco-Institut has been a leading provider of emission and pollutant testing of construction and furnishing products that evaluates products according to national and international criteria. The Eco-Institut label has been awarded for the past nine years and is one of the leading international quality seals for products low in harmful substances and emissions.

The 'blue angel' label also guarantees that the products meet high standards in terms of their environmental, health and usage properties. It includes the entire life cycle of a product in its testing.

That is the reason why we subject ourselves to annual external audits by these renowned institutes. In order to achieve certification from these organisations tested products must be particularly low in emissions and thus suitable for healthy home living.

# Act sustainably

## Responsible and ecological

We have nature to thank for the material wood. The responsible handling of this valuable resource is therefore a fundamental part of our company philosophy and covers all areas and processes of our company. Ter Hürne has FSC® and PEFC™ certification and supports the environmental and social aspects of a fully traceable and recognised sustainable forestry industry. The careful selection of the growth regions and the trees growing within them are crucial for our high quality standards.

The mark of responsible forestry

# Engineered Hardwood Flooring Design

## Unique planks enhanced by hand

Every piece of wood, every plank tells its own story. In our Unique collection we bring them to life. Varied knot patterns, heartwood or distinctive shakes, with a high proportion of colour variation or sapwood – these are all expressive characteristics for the impulsive grade of our Unique surfaces. We treat the unique characteristics plank by plank and accentuate them by hand, while retaining the original character of the wood. So each plank becomes a unique hand-finished specimen, with incomparable design, unique charisma and value.

# Genuine Craftsmanship

## Hand-scraped

Inspired by the hand-scraping process: We guide a slightly rounded planing knife in gentle wavy lines over the plank. This enables us to achieve a natural-looking variation in the surface that feels particularly pleasant.

## Knot enhancement

When timber planks are air-dried, the hard knot parts shrink less over time than the rest of the plank. We accelerate this process and produce by hand an effect that normally only emerges after years.

## Split oak

Wood is a living material that is permanently expanding and contracting. Stress cracks are natural changes that are a model for us when designing surfaces. Our craftsmen skilfully produce and accentuate this unique character.

# Engineered Hardwood Flooring Design

## Moods of Provence planks with round bevel

The afternoon sun sinks over the violet sea of fragrant lavender plants, which stretch their graceful curves in lines straight as a die, almost endlessly to the horizon...

The gentle swaying curve of lavender plants in French Provence is the inspiration for our Moods of Provence collection. The expressive surfaces processed as planks are characterised by their special round bevel. Partly planed for still more haptic impressions, our Moods of Provence are a concert for the senses. A fabulous walking experience.

# A fabulous walking experience

The rounded bevel:

A treat for the eyes and feet

The planks in our Moods of Provence collection stand out with their specially finished rounded bevels. Gently rounded long sides create a soft and flowing transition from plank to plank – pleasing to the eye and foot.

When laid in the room, the floor appears especially balanced and harmonious. The rounded bevel makes each plank appear larger, thus bringing out the grown character of the wood to striking effect.

## Heaven

### extra-matt lacquered & naturally calm planks

The planks of our Heaven collection radiate a gentle, almost heavenly tranquility. This collection follows the trend to quieter surfaces. To do this, we combine a balanced grade with modern colours and finish the surfaces with our special soft brushing and an extra matt finish. This surface enhancement gives the planks a timeless and genuinely natural appearance. The extra matt finish reduces reflections to a minimum, allowing the colours and natural beauty of the flooring to be experienced more intensely. When laid, the result is a floor with a pleasant silky feel and a bright freshness.

# Balanced freshness

## Harmoniously calm and varied

Our Heaven planks have an extra matt finish with a multilayer coating system. This coating also protects against stronger impacts because it is both elastic and flexible. It also provides good protection of the wood surface against everyday wear and tear. The extra matt coating also accentuates the calm appearance of the floorscape.

A particularly soft brushed finish emphasises the timeless, clear effect of the Heaven surfaces. Each Heaven plank is continuously tested for the appropriate degree of gloss. In addition, a ter Hürne expert takes samples to guarantee a perfect result.

The colours of the Heaven and Earth Collection are also available as herringbone and system planks from the Flemish Heritage Collection (page 28).

# Engineered Hardwood Flooring Design

## Earth

### natural oiled & expressive planks

The variety of the earth is the model for our Earth collection. The colours of the planks in this collection are vibrant and strong with an expressive range.

Through the skilful use of natural effect oils, we succeed in stimulating the interplay of colours in each individual plank - sometimes subtly, sometimes intensely, always in tune with the various eco-certifications.

# Impressive intense colours

## Lively and powerful

With our Earth floors, we have for the first time succeeded in combining the special effects of curing and effect oils with the strict requirements of the Eco-Institut and the 'Blue Angel' for a healthy home environment.

An important factor here is time: During its creation, we let the plank rest up to three times overnight, to let the unique, completely natural play of colours appear. The result is colour variations that turn the special characteristics of oak - its characteristic medullary rays, colour nuances produced by the acid content in the wood - into a healthy living experience.

[www.blauer-engel.de/uz176](http://www.blauer-engel.de/uz176)

The colours of the Heaven and Earth Collection are also available as herringbone and system planks from the Flemish Heritage Collection (page 28).

# Engineered Hardwood Flooring Design

## Contours

### contoured strip floors & basket weave

The special bevelled versions in our Contours collection create distinctive floorscapes. The skilful use of the Contura bevel accentuates individual elements and creates a fantastic interplay of light.

The intensive brushing and treatment with natural oils additionally accentuate the naturalness of the surfaces. The result is high-contrast accents for an architecturally elegant floor ambience.

# Stylish contours

## 3-Strip floors Contura

3-strip floors reinterpreted: A love of detail and special craftsmanship are the hallmarks of our Contura strip floors. Each single stave of variable length is brushed and given a four-sided bevel – the Contura bevel – which makes it stand out from the next stave. This creates a modern ‘used look’ of a floor that has been in the prime of life for many years and has acquired a certain patina.

## Contura basket weave

The Contura bevel is also used in basket weave pattern of engineered hardwood flooring. Three longitudinal staves with contoured long sides meet two contoured transverse elements. Combined with other planks, it creates an artistic basket weave look with an impressive spatial effect.

# Engineered Hardwood Flooring Classics

## Grand Naturals oiled planks

Our Grand Naturals collection of natural oiled planks is completely natural. With gradings from even to expressive, each individual plank displays its grown origins in an impressive manner. What we are particularly proud of in this collection is its versatility: Whether traditional, classic or modern - Grand Naturals floors can be perfectly integrated into any interior style and give every room an impressive design. We treat the open-pored surface of each plank with a breathable oil based on natural raw materials. It accentuates the natural, unspoilt colour character of the original wood and gives the surface a pleasant warmth.

## Grand Velvet matt lacquered planks

Generous and diverse – these qualities characterise the planks of our Grand Velvet collection. The surfaces made of various timber species, ranging from even to expressive gradings, are mainly matt lacquered. This gives them a pleasant, velvety feel, reflections are reduced. The shades of the Grand Velvet planks are understated, ranging from deep brown to soft grey to crystal white. They are perfect floors for nearly every interior design style, and particularly uncomplicated in everyday life due to the extra lacquer coating.

## Satin Elements matt lacquered strip floors

For our Satin Elements collection, we compose a selection of 3-strip floors with lacquered, well-proportioned surfaces from various species of wood with lacquered, harmonious surfaces. When installed, they create a harmonious floor with a classic, luxurious impression.

Incidentally: ter Hürne 3-strip floors are unique due to the production technology, in which the staves can be arranged in over 60 different ways. With a stave length of up to 500 mm they are significantly longer and more diverse than is usual for a 3-strip floor.

## Pride of Nature oiled strip floors

Wind and weather, storm and calm, light and shadow - we combine nature's many facets in the Pride of Nature collection of classic 3-strip floors. The expressive grade shows the structure of the wood to perfection, accentuated by intensive brushing. We treat all surfaces in this collection with natural oils. That allows the colours of the wood - 'the pride of nature' to shine throughout their entire spectrum. When laid, these multifaceted 3-strip floors create a spirited floor aesthetic.

# Engineered hardwood flooring in detail

## Real wood middle layer

Wood is a living material that is constantly expanding and contracting – particularly under conditions of fluctuating humidity. In order to ensure that the parquet plank nevertheless remains dimensionally stable and can be perfectly installed and does not warp even when laid, we at ter Hürne use solid wood staves with standing growth rings for the construction of the middle layer. This is a selected piece of wood, which is characterised by special stability.

We also leave air gaps between the individual staves to ensure an optimal distribution of the humidity in the wood. In this way the tensile forces exerted by the individual parquet layers can be neutralised in favour of superior dimensional stability – ter Hürne quality in fact.

 A selection of our engineered hardwood flooring is certified fire protection class Cfl-s1. Please contact us if you require further information.

 30-year guarantee — Quality made in Germany.

 Suitable for hot water and electric<sup>2)</sup> underfloor heating systems.

 With CLICKitEASY you can install your floor yourself like a professional – simply, quickly and securely. That is thanks to our ingenious, patented connection system based on the door lock principle. The head ends of the planks click together with only light pressure. A tongue made from stable plastic incorporated into the head end ensures that both planks lock together simply and securely like a door lock. This ensures a permanent and strong joint. CLICKitEASY is the perfect method for a floating floor installation without adhesive, hammer and tapping block or for glue down installation.

  <sup>1)</sup>Herringbone and system planks have an HDF middle layer, a Kraft paper stabilising layer and tongue and groove PRO connections – The herringbone and system plank formats are always installed glued down.  
<sup>2)</sup>for electric surface heating systems with gentle warm-up technology and temperature control unit.

## Impregnated

You should avoid leaving water on the engineered hardwood flooring for any length of time, especially in places where it can easily penetrate, such as on the ends of the planks or staves. If that happens it can have unfortunate consequences: swelling and raised head ends which will lead to damage over time. We have developed a special process to prevent these consequences: We treat all wood joints – at the ends of planks or staves – with an environmentally healthy oil-wax emulsion that forms a highly effective protection against penetrating and damaging moisture.

# Formats

## Spatial effect

The format sizes of the planks not only determine the appearance of the floor, they also have a decisive influence on the overall ambiance of the room: Long-format planks give your home extra spaciousness, the new herringbone format and the system planks allow a variety of different classic installation methods.

- ① Plank
- ② Plank  
3-strip Floor  
Basket weave

Each pack (planked) can contain up to 2 layers of half boards

# Profiles

## Round bevel

The gently rounded bevels of the four sides of the plank feel soft, but in contrast, have a very distinctive appearance. This gives the planks in particular a distinct emphasis on their format.

## V-bevel

The shape of this four-sided bevel resembles the letter 'V'. Its profile provides a subtle contrast to the generous format of the planks.

## Contura bevel

Each of the staves of varying lengths is bevelled on all four sides thus clearly standing out from each other.

# Gradings

## A fundamental design decision

The grading is a fundamental design characteristic and has a decisive influence on the overall expressive effect of a wooden floor. Every plank of wood is unique. And because each species of wood has its own 'personality', there is a wide variety of characteristics such as knot content, grain and colour variation. Our gradings result from the selection and composition of the individual engineered hardwood flooring planks - each of which has its own individual character - according to our design criteria.

- ① even
- ② balanced
- ③ expressive
- ④ impulsive

*Note re. grading:* Variations in the grading of the wood surface cannot be excluded due to the natural raw material. To permit these natural and unavoidable variations in the grading classes, up to 5% of the staves may be taken from another grading class. (Extract from EN, european Norm, 13489:2002)

# Surface finish

## Final perfection

### Lacquer

Lacquered floors have a silky shine, matt lacquered finishes have a silky matt effect and extra matt lacquered surfaces absorb light and therefore look completely natural. All three designs are of the same high quality: The multi-layered coating system also absorbs stronger impacts because it is both elastic and flexible. On the other hand it is hard, thus protecting the surface from daily wear. Because the surface is completely sealed and protected, our lacquered floors are particularly easy to care for.

### Natural Oil

We treat the porous surface with a breathable oil based on natural raw materials. It penetrates deep into the wood and strengthens it from within. Thanks to our special oil treatment, our natural oiled engineered hardwood flooring is breathable; absorbing moisture and releasing it again as required. This has a positive, regulating influence on room climate and creates a healthy living environment. In addition, the visible and tactile structure of the wood is preserved.

# Skirtings

## The crowning finish

A perfect floor is the sum of many details. Especially the skirtings complete the overall impression. Ter Hürne has a comprehensive selection of skirtings to match many decors, both as real wood and decor laminates.

All the benefits at a glance:

- simple, concealed installation (fixing clips or adhesive)
- concealed cable routing
- damage-free wall renovation
- no masking off required

ter Hürne skirtings are available in a range of colours depending on the article.

Neutral, decor and real wood skirtings

# The stair and step system

## Easy. Perfect. From floor to floor.

Our ter Hürne floor doesn't stop when it gets to the stairs. With CLICKitEASY, continuing the stairs to the next level.

All the benefits at a glance:

- floors and stairs have a uniform, harmonious appearance.
- unique ter Hürne designs are transformed into stair and step profiles
- nosing profiles to match the ter Hürne ranges of luxury vinyl tiles and engineered hardwood flooring
- simple, compact system with just three components
- finished nosing profiles can be simply cut to size on site
- ideal for renovating existing stairs and steps
- nosing profiles and floor planks are laid simply, quickly and securely with the CLICKitEASY long-edge connection
- perfect left and right-handed nosing profiles save the need for an additional edge trim
