The comfort floor with the strength of the soya bean

My Sōya Luxury Vinyl Tiles

Lived values

Editorial

The floor in your home is much more than just a covering.

It's where your children learn to crawl before they take their first steps. Lego towers are built there and pictures are painted, guests come in and out, not to mention pets. There is no doubt about it: the floor plays a major role in creating a really great atmosphere for your home. And by the way, it just happens to be the largest piece of furniture in the room in terms of its surface area.

At ter Hürne, we know all about the importance of your floor, because our love of wood and its positive, natural properties have formed the basis of our company for more than 60 years. We have made a name for ourselves in the industry as one of the leading manufacturers of engineered hardwood flooring in Europe. Today, we apply all of our expertise to produce innovative floors that are ideally suited to life with all its different requirements, while also protecting the environment.

Healthy living is our key promise to you. Our portfolio in the real wood segment and our natural-looking collections in the wood and design floor segments all have something in common. We do not make compromises in manufacturing: not in the design, the feel, the quality or the function – and certainly not when it comes to healthy living. Throughout the entire process, from the initial concept to product development and manufacturing, all ingredients are designed to have a positive impact on the health and well-being of occupants. With us, living is naturally healthy – and simply beautiful. And that's something you can rely on – no ifs or buts.

Bernhard ter Hürne

WITH THE STRENGTH OF THE SOYA BEAN

More than just healthy

We use a plant-based plasticizer for our luxury vinyl flooring. We obtain it from an oil also used in the food industry – soya bean oil.

Bio-based soya bean oil provides our floors with the best properties. They are soft, pleasantly elastic and unobtrusively quiet, while remaining robust and durable.

The power of the soya bean makes your luxury vinyl flooring particularly low-emission and gives you a feeling of security.

**Information sur le niveau d'émission de substances volatiles dans l'air intérieur, présentant un risque de toxicité par inhalation, sur une échelle de classe allant de A+ (très faibles émissions) à C (fortes émissions).*

From the start it was crystal clear for us: There would only be design vinyl floors by ter Hürne if we were able to produce them free of harmful phthalates

*Bernhard ter Hürne

MADE FOR LIFE

The perfect companion for your everyday life

Walking on our design vinyl floors is agreeably quiet and soft. Even so, it is tough. You can't see its robust nature. It is hidden in the material and its smart construction. It hardly matters what happens to it. It can take water, dirt and dog paws in its stride. It is easy to care for and is clean again in no time at all. It stays just as serene as you.

Antibacterial

MADE FOR EVERY APPLICATION

Design or function? Both!

You decide on the design – we deliver the perfect functionality. With **Sōya 1** and **Sōya 2** your style becomes the basis for three customised solutions. True to the principle "form follows function" – except the other way around.

You can find out more about the 3-in-1 system on the following page.

Sōya 1

Sōya 2

Perform – if you want it all

You are looking for a floor that works in every situation? Sōya Perform offers you the perfect combination of high quality, comfort and practical benefits. The extremely robust multilayer SPC baseboard, reinforced by elastic vinyl layers, makes it extremely resistant to the challenges of everyday use. Whether as floating or professional glue-down installation – Sōya Perform adapts flexibly to your needs. The integrated cork impact sound insulation ensures a pleasant walking sensation. A versatile floor that will impress in every situation.

Comfort – the comfortable choice

If you are looking for a floor that is particularly easy to install and is suitable for DIY projects, then Sōya Comfort is your best option! Thanks to the practical click system it can be installed quickly and effortlessly – ideal for anyone who wants to renovate their floor themselves. The natural HDF baseboard made of real wood ensures a pleasingly warm and authentic walking sensation. The integrated cork impact sound insulation absorbs disturbing noise and ensures a quiet living environment. In addition the SEAL technology protects the floor from moisture and ensures it is water resistant for up to 48 hours.* A high quality floor that combines comfort and natural materiality!

*Based on ISO standard 4760 in the standard NALFA test.

Pro – for professional glue-down

For the highest demands on durability, walking comfort and room acoustics, there is Sōya Pro – specially developed for glue-down installation. The elastic structure adapts perfectly to the building structure and ensures a harmonious connection with the subfloor. This means soft walking comfort and optimum footfall sound insulation. Its high water resistance also makes it the ideal choice for large, open-plan living areas or damp rooms. Thanks to its special construction Sōya Pro is perfectly suited to seamless installation from room to room.

Solid – the strong floor

Sōya Solid is the right choice for anyone looking for a robust and long-lasting floor. The SPC-baseboard ensure a high degree of stability and resistance, ideal for residential spaces with high traffic, offices or commercial spaces. The resilient wear layer protects the floor from wear and tear and makes it easy to maintain. At the same time, the IXPE-impact sound insulation contributes to pleasant room acoustics. Thanks to the click system Sōya Solid can be installed quickly and easily, with no gluing necessary. A solid solution for anyone looking for a reliable and long-lasting floor covering.

IF YOU WANT IT ALL

Perform ¹

- 1 Transparent, hard-wearing PU-coating
- 2 Transparent wear layer with embossed structure
- 3 Printed decor layer
- 4 LVT middle layer
- 5 Baseboard SPC
- 6 LVT stabilizing layer
- 7 Cork impact sound insulation

* Suitable for water-based and electric underfloor heating systems. Heating systems with reverse cycle cooling must be fitted with an automatic control unit for dew point regulation. Only suitable for electric surface heating systems fitted with gentle warm-up technology and a control unit for automatic dew point regulation.

THE COMFORTABLE CHOICE

Comfort SEAL ^{1&2}

- 1 Transparent, hard-wearing PU-coating
- 2 Transparent wear layer with embossed structure
- 3 Printed decor layer
- 4 LVT middle layer
- 5 HDF baseboard
- 6 Cork impact sound insulation

* Suitable for water-based and electric underfloor heating systems. Heating systems with reverse cycle cooling must be fitted with an automatic control unit for dew point regulation. Only suitable for electric surface heating systems fitted with gentle warm-up technology and a control unit for automatic dew point regulation.

APPEAL TO THE SENSES

Design down to the last detail

With Sōya you experience floor coverings that not only look authentic, but also feel just as authentic. Many of our floors have a **synchronised structure** – this means, that the you can feel the grain pattern exactly where you see it. Coarse knots, gently sanded surfaces and fine grooves in the annual rings provide a real wood look that you can feel with every step.

Our new decors are also visually appealing: The **super-matt surface** reduces the light reflection and gives the design a natural depth. This brings out the fine details of the grain even better and your floor looks as authentic as real wood – only easier to maintain and longer-lasting.

MORE SPACIOUS, MORE STYLISH

Generous XL formats

The trend is towards large formats, and this is exactly where our decors come in. With their generous surfaces, they create a harmonious and seamless look that makes rooms appear more open, serene and spacious. Fewer joints not only mean a modern look, but also a light and airy ambience.

Our **XL stone decors in 1,200 x 600 mm format** and the **long planks of the wood Edition** with a length of **up to 2.200 mm** fulfil exactly this demand. Whether in the living area, bathroom or study – these new large format designs bring a new dimension to your room design.

COMBINED FOR IMPACT

The dynamics of herringbone & chevron

You love stylish floors with character? Herringbone and chevron bring movement and structure into your rooms – without being intrusive. The dynamic laying patterns in the Sōya Range lend a special sophistication even to simple or small rooms. The angled configuration of the planks creates an intriguing depth that will make your floor really eye-catching.

New for Sōya Vinyl: Chevron – the refined French herringbone. Here, the planks meet precisely at a 60° angle and form an elegant V shape. In comparison to the classic herringbone where the planks are arranged at a 45° angle, chevron has a more serene and harmonious effect. This pattern goes particularly well with modern and prestigious rooms and lends them a timeless elegance.

Did you know?

Our Herringbone & Chevron Editions each offer you 10 decors that are perfectly matched to the planks in the Sōya range. So you can combine different laying patterns, without sacrificing a consistent aesthetic – for maximum design freedom in your home!

MY VIRTUAL FLOOR

My Room Studio

With our virtual Room Studio you can view all of our floors in your own home. Here and now. Just use your smartphone. As soon as you are in the Room Studio you have two options:

- 1 You can either take a picture of your room with your smartphone and select your preferred floor, which you lay virtually.
- 2 Or you can select room images from our gallery and virtually lay your preferred floor there.

With our virtual Room Studio you can look at all of our floors in the comfort of your own home either on your laptop, tablet or desktop computer. Due to the size of the display, this is sometimes the better alternative. Just click on the "Room Studio" button on the right-hand side of the screen.

Insert your own room photo, take out the old floor and experience the new floor in your own room!

ORIGINAL ACCESSORIES

The big Plus

There are so many good reasons to choose a floor from ter Hürne. One of them is that our quality management also perfectly matches the accessories to our collections in our own test laboratory.

“Our experience clearly shows that compromises in accessories are expensive in the long run. Maximum quality and longevity in flooring are always demonstrated in the interaction with the complete system: how does a certain adhesive interact with the floor undertemperature fluctuations? Which underlay material causes material to become fatigued more quickly? We ask ourselves questions like these and others every day in the laboratory and therefore know that choosing a system of proven quality is also the best way to save in the long run.”

4 good reasons why you too should rely on ter Hürne system solutions:

- **Smart:** You get a consistent system for every floor concept, which ensures easy and quick installation.
- **Quality:** The smart ter Hürne system is a guarantee for a floor with maximum quality and longevity. Because all components are perfectly coordinated with each other.
- **Healthy living:** We only use materials for a healthy home environment and, of course, this also applies to the accessories.
- **Visual appearance:** All ter Hürne floors perfectly match our skirting and step systems. This gives you a successful floor concept in terms of appearance.

Bernd Kernebeck
QA technician at ter Hürne
