NATURE MAKES THE BEST GUIDE

This is your way

Navigate through the wonderful world
of healthy living design ideas for floors, walls and ceilings

TEAM TER HÜRNE

Our course: in harmony with nature

For over 65 years the name ter Hürne has stood for values that are deeply rooted together – in our company's history, in our family and in our number one material: wood. It is more than just a material. Wood for us is a feeling, a way of life, the material of the future.

No other material combines so much that is good: natural beauty, sensuous texture, sustainable origin and timeless aesthetics. Wood is alive – and exactly that is what inspires us. It is our origin and it remains our benchmark, against which we measure all our products – yesterday, today and tomorrow.

We are a family-owned company based in Münsterland – down-to-earth, genuine and passionate about what we do. Craftsmanship runs in our veins and has defined every detail of our work for decades. Passion and fun inspire the spaces we create, which feel both natural and alive – full of warmth, character and life.

LOOKING AHEAD

The direction is right, if the values remain

When I think of my childhood, I think of wood – the smells in my father's workshop, the woodchips on the floor and of the calm way he built things. My father, Otger ter Hürne, was a joiner and joinery was his passion. He founded his company in Südlohn in 1959 – that was the beginning of our story. We are still a family-owned business today.

And even though we have grown – to around 250 colleagues – one thing has stayed the same: Our deep appreciation for wood as a material. It has always been our benchmark. Its naturalness, its healthy properties and warmth inspire us every day – also in the development of new smart, sustainable materials. The trust placed in us over the last decades inspires our promise: to keep moving forward, to keep innovating and to safeguard what is good.

Great having you get to know us.

Bernhard ter Hürne
Managing Partner

FEEL, BREATHE, HEAR – LIVE

Space for the senses – space for health

Our products are your daily companions – they are all around, like a second skin for you and your family. We at ter Hürne are aware of our responsibility to use materials that promote your well-being.

Because real wood works for you

Real wood can do more than just look good: It breathes, regulates humidity, calms the heart and nerves and brings you restorative sleep. It is anti-static, keeps dust and irritants away – a natural protection for your well-being. We keep precisely these qualities and make sure that all the materials we use in our production meet health expectations.

When design products can do more

Our floor, wall and ceiling solutions stand for naturalness and well-being: The Avatara Design floor does not contain any PVC, chlorine, plasticisers or solvents – made from the innovative material Talcusan®. With the Sōya vinyl floor we rely on a bio-based plasticizer made of soya bean oil – for tangible elasticity and minimal emissions.

good to
KNOW

The latest generation of natural oiled wooden floors by ter Hürne is completely free of harmful substances such as benzophenone and monomers – better than the required limits.

And our acoustic panels? They are made of real wood, reducing noise, lowering stress – and bringing calm for body and soul.

LESS SHOW, MORE QUALITY

Design that makes values visible

We design spaces that connect with people and withstand the rigours of everyday life. Design doesn't start for us at the surface and it doesn't end there either. It is created through a combination of material, structure, colour, function and feeling. Whether real wood with its natural character, innovative design floors with their contemporary looks modern or wall designs that are aesthetic and well thought out.

What is our inspiration? Nature. People. And the desire to see them in harmony. We don't blindly follow fashion, we develop long-lasting designs with a clear purpose: They should craft spaces, create atmosphere and fulfil needs. Visually as well as functionally.

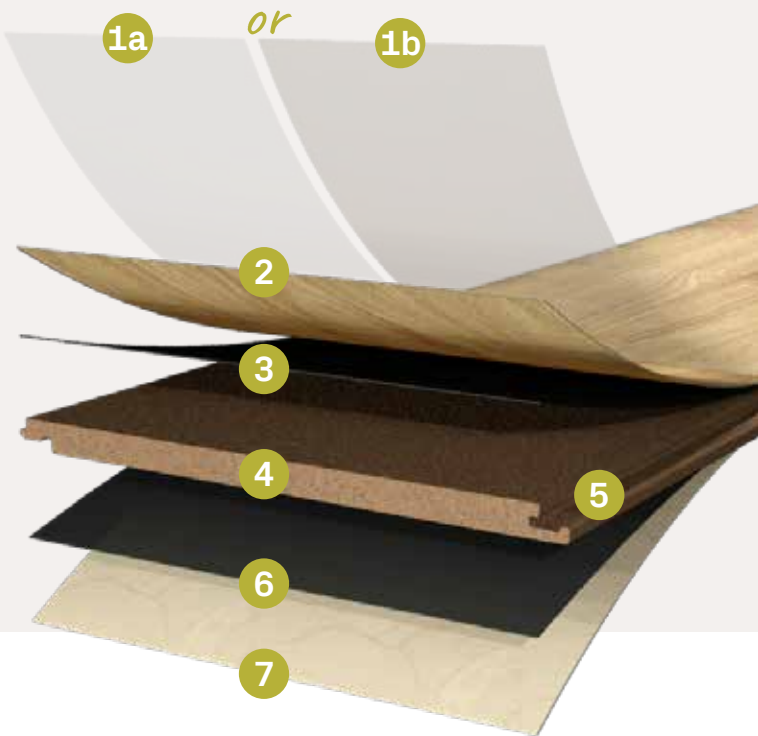

A good example: The design of our Sōya Design floors. We are investing simultaneously in two cylinder sets for the decor development. This will enable us to reduce the visible repetition of wood features such as knots or intergrowths. The result is a floor aesthetic that looks calm, authentic and harmonious.

Technology, working for you

Our smart floors consist of an intelligent multilayer construction, whereby each layer is specifically designed to ensure stability, comfort and durability. Whether real wood or design-based, every added value originates from the clever material mix and the production technology which combines it all.

Example Hywood – Every layer carefully considered

- 1a Nature Protec EVO surface sealant
- 1b Nature Protec OLIO surface sealant
- 2 Design layer made of real wood
- 3 Wood powder layer made of wood powder and high-grade resins
- 4 Aqua Seal baseboard made of extremely high-density wood fibres
- 5 Aqua-Seal profiling „CLICKitEasy Pro“
- 6 Wood powder layer made of wood powder and high-grade resins
- 7 Stabilising layer made of real wood

Strong connection – easy installation

Clever connection technology makes installing a breeze. The planks fit together perfectly, align automatically and ensure high stability throughout the entire structure. The precise profiling on the head and longitudinal edges ensures an exact fit and permanently secure joints – whether floating or glued down.

Accessories – for the perfect finish

The right accessories make your floor complete. High quality underlay materials and effective footfall sound insulation ensure a high level of comfort. Together with the stable click connection this creates a coordinated ter Hürne floor system. Our wide range of skirtings and profiles creates clean transitions and completes the overall look. And with our coordinated cleaning and care products your floor will remain beautiful for a long time.

Clearly classified, easily selected

Every one of our product lines fulfils a specific requirement. They are made to complement each other in terms of material and quality. Real wood or a design alternative? High-end version or from the premium segment? Whichever suits you will surely be available.

Orientation is good

Finding the right product for floors, walls or ceilings is not that easy. After all, you are making a long-term decision and you would like to be able to say, years later, that it was the right one. You have already made a good choice. Because the flooring and panelling ranges by ter Hürne embody genuine values you shouldn't do without.

This is your way

We have briefly summarized all the product ranges to help you get started quickly. Each product category is characterised by its high quality features. Explore them and decide what is especially important for you. Once you have found your favourite, use our room studio to experience your chosen product first-hand. You can even upload a photo of your own room.

We hope you will find lots of inspiration on the following pages and wish you a good journey and safe arrival at the destination of your interior design ideas.

€€€€€

Since personal budget also plays a role in every purchasing decision, we have assigned a value scale from 1 to 5 to each range in the form of € symbols.

WITH RESPONSIBILITY

On the safe side

Our products have been awarded renowned certifications for healthy living, sustainability and ecological safety. They are the visible proof of our ambition to take responsibility – for you, for your family and for the environment.

Because what you touch every day, what you walk on and what you live in, should give you a good feeling. Free of harmful substances, tested to the highest standards and manufactured with respect for people and nature.

Look out for our FSC®-certified products.

Dureco Floor

Avatara
Design Floor

The following products are also Blue Angel and ECO certified: Avatara Design Floor, Dureco Floor, Ikō Premium Laminate Floor, Hywood, Naturholz Parquet and Tailored Parquet.

THE DESIRE TO DESIGN

Feel free

The largest item of furniture in your room is the floor. And the largest picture your panels. Because these surfaces have such a strong impact on the overall look of the room, each of our product designs is inspired by influential trends and styles to provide the perfect backdrop for your interior design – from the most generous formats to the finest details. Each of our ranges gives you this creative freedom.

Colour

What is your perception of nature? The lightness of light-coloured surfaces, the cosy harmony of medium brown tones or the character of dark woods – discover your colour tendency.

Design

Nature is and always will be the ideal. Whether wood or stone – shaping nature or deriving creative variations from it is what makes a good design. Which interpretation will you choose?

Format

Fun, calm, sturdy or lively? It is also a question of the format. Extra wide planks, planks, 3-strip, herringbone – where does your journey take you?

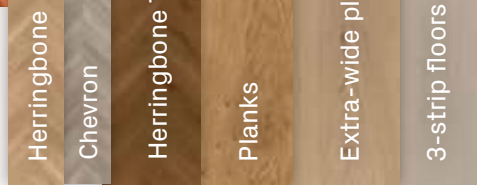

Finishing

You only appreciate a surface properly if you feel it. Then you appreciate all the expertise that has gone into it – from deep planing to fine sanding.

*Natural colour and structure differences are possible.
Non-binding colour representation of the products.

The examples give you an initial impression of the size ratios of the various plank formats.

UNMISTAKABLY NATURAL

Powered by Nature

When it comes to products made from real wood, we use the term „Powered by Nature“. A tree provides us all with a sustainable and at the same time circular material. Our shared future is built on this. Furthermore, wood is a health-promoting material –both with its effect on the indoor environment and through its unique ingredients, which have a positive effect on your living environment. Every tree that has grown over decades, defied wind and weather and developed such unique grain patterns and colour variations. We refine these unique qualities in every single plank so that you can enjoy an inimitable ambience every single day.

Naturholz Parquet

We keep the original but in combination with the new. This is how the healthy power of wood works for you. Our craftsmanship and our ingredients for a healthy living environment ensure uncompromising durability and values. Every one of our designs emphasises the beauty of the unique features of real wood – visibly and tangibly, just like the technical precision behind it. That is our signature for your unique parquet flooring.

that's ME

- **Unique designs** featuring three-dimensional surfaces and a natural look – with deep, authentic, natural wood colours.
- Enjoy the feel of pure, genuine wood and **high durability in everyday use** thanks to the leading surface technology NatureProtec – both oiled and lacquered.
- Pure, authentic and healthy in many ways and **good for your well-being**.
- Coordinated care – for a long-lasting beauty and **enduring looks**.

good to KNOW

Your ter Hürne parquet flooring with floating installation and underfloor heating are a great team. Our construction ensures dimensional stability, the warmth penetrates the floor well and is optimally distributed through the room. This is even more efficient if the parquet is glued down because there will be no insulating air between the material and the screed. And our parquet flooring is even more acoustically pleasing when glued down.

Find your way to the range

Oak Palatino*

Inspiration for you

Nature constantly whets our appetite for new designs. We grade the wood according to its characteristics colours, sapwood content, knots, structure and grain pattern. Every parquet floor thus acquires its own character, which you can recognise in the different descriptions: calm, balanced, expressive or impulsive.

Oak St. James*

Oak Montmartre* | plank

NATURALLY HEALTHY WOOD – TO THE CORE

Naturholz Parquet

We create products with which you come into contact every day. They are an important part of your home. Our floors play their part in making you and your loved ones feel completely at ease. So that this stays the case in the long term, it is important to maintain a healthy living environment. For example, real wood ensures ideal air humidity and promotes a healthy indoor climate with its components. And the certified ter Hürne quality ensures that the finished parquet flooring is as healthy for you as the original wood material.

Oak Texel* | herringbone

Oak Park Avenue* | plank

Tailored Parquet

Tailored Parquet has all the good properties of natural wood. The aura and warmth of healthy real wood of the highest quality leaves nothing to be desired in terms of durability and design. What is unique about Tailored Parquet is that among its wide selection, it is tailored to your design preferences.

that's ME

- The tailored principle guides you to your dream parquet – step by step:
1. **Choose your plank format:** generous planks or dynamic 3-strip?
 2. **Find your colour:** Scandinavian fresh or as Nature created? Tailored has 8 colour groups.
 3. **Which grade suits you?** Expressive with lots of wood characteristics or balanced for a harmonious, quiet floor?
 4. **Last but not least, the surface finish:** Natural oiled – particularly tactile – or matt lacquered with a silky matt sheen.

good to KNOW

In the Tailored world by ter Hürne you can also find the popular herringbone format in a special collection of large formats. In the same 8 colour groups you will discover your playful geometric herringbone design. With its low installation height of 12 mm this format is especially good for renovations.

Find your way to the range

Inspiration for you

Three strip is one of the most popular installation patterns for parquet flooring – with good reason: the staggered formation of the staves creates a lively yet composed overall look. Our 3-strip floors are of particularly high quality: We use only long individual staves – with no short pieces at the plank ends, as they would disrupt the harmonious appearance.

Oak Bordeaux*

Oak Cabernet*

Oak Champagne* | 3-strip

Hywood

You love real wood, but high practical value is even more important for you? Then you will welcome Hywood. We use three innovative technologies, each one generating high resistance for Hywood. What's special: Together they become even more effective. We call that high durability. Discover real wood with an unprecedented practical value.

that's ME

Real Wood – highly resistant to water, dirt and scratches thanks to:

- 1. Wood powder technology** – real wood wear layer, wood powder and high-grade resins fuse together to form an extremely resistant surface composite. The genuine wood experience is preserved, visually and haptically.
- 2. Nature Protec** – the highly advanced surface technology with extra pore protection, is available in oiled or lacquered versions.
- 3. Aqua Seal** – moisture protection in the baseboard and around the edges and the profiles.

good to KNOW

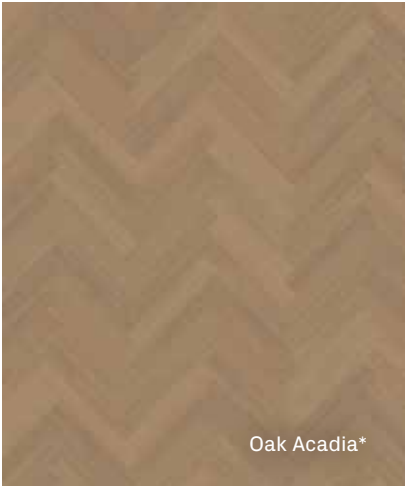

Hywood lets you set your own priorities: If it is important to you to live with the genuine feel of real wood, then the unique, triple-oiled Nature Protec OLIO surface is perfect for you. If your priority is exceptionally easy maintenance, then the lacquered Nature Protec EVO version is right for you. Both are highly durable with in depth protection – and naturally also healthy for the home environment, because Hywood is made of real wood.

Find your way
to the range

Inspiration for you

With all the functionality of Hywood, the design experience is not neglected. The range exploits the many varied and typical wood characteristics. An eyecatcher: the small herringbone format. Clearly geometrical but not fussy. Dynamic but not restless. Available in nine designs from Hywood. Or are you rather looking for impressive dimensions? There are 21 extra-wide Noblesse planks like this for you.

THE HIGHLY DURABLE REAL WOOD HYBRID FLOOR

Hywood

There is a reason why oak is the number one wood species – it stands for strength, style and substance. Hywood goes even further: With elegant planks made of ash or the dark, luxurious walnut you can make a real statement in the room. These wood species don't just want to please – they want to be noticed. When you choose Hywood, you are choosing real, highly durable wood with a clear design aspiration.

*The floors are wood or stone imitations.

THE PERFECT INTERPRETATION

Inspired by Nature

Nature is our greatest designer. Her forms, structures and colours inspire us – and it is precisely this essence that is captured in our "Inspired by Nature" floors. We interpret the timeless beauty and looks of natural wood and stone and combine them with innovative technologies and materials. Thus we create healthy living floors, which are not just aesthetically stunning, but also stand up to the challenges of everyday life.

Dureco Floor

Dureco is the leading wood-based design floor. Plastic-free and water resistant, sustainable and ecological, because it consists almost entirely of wood. Its robust surface means that in terms of practical value Dureco is simply the best, either in the extra thick version “Strong” or in the version with integrated footfall sound reduction “Silent” Dureco is your champion for everyday comfort.

that's
ME

- Dureco is **plastic-free**, made from natural and sustainable materials.
- Up to **48 hour water-resistance** allows installation in kitchens and bathrooms. The robust, hard surface offers everyday protection against shocks and scratches in the highest usage class.
- **Two versions:** Dureco Strong in extra thick 12 mm for superior stability or Dureco Silent in 7 mm with integrated footfall sound reduction.
- **Blue Angel and ECO** – the best certifications for a healthy living environment.

good to
KNOW

Two innovative components achieve the water-resistance. The innovative click system Smart Connect Pro Aqua protects the click connection profiles. This prevents the ingress of standing water – for up to 48 hours. The highly compressed baseboard and its specially developed processing is the second element contributing to the particularly high water-resistance of Dureco.

*Find your way
to the range*

Inspiration for you

Now you can enjoy nature in every room, including the bathroom. Dureco planks, even the large formats, offer carefree comfort and combine aesthetics with healthy living functionality, especially its outstanding robustness– for cooking evenings, children’s birthdays or households with pets.

THE WATERRESISTANT ECO-FLOOR WITH THE SOUL OF WOOD

Ikō Premium Laminate Floor

Imagine a floor that is not only incredibly authentic, but feels like that too – warm robust and just perfect for your home. Our Ikō Premium Laminate Floor raises this classic to a new level – made of sustainable materials, really easy to care for and long-lasting.

that's
ME

- Surface sealed with a resin bond Corundum coating.
- High quality click connection for simple and safe installation.
- Up to 24 hours water resistant with the swell- protected baseboard and our Smart Connect Pro Aqua click profile.
- Outstanding value for money in the highest usage classes.

good to
KNOW

Ikō Premium Laminate Floor also has impressive sustainability credentials. Manufactured almost entirely of natural materials, we systematically avoid any harmful ingredients for Ikō. Our production is also based on wood from sustainable forestry, with around 80 per cent sourced from local forests - a clear commitment to regional responsibility.

Inspiration for you

Look carefully: Form, colour and surface structure play an important role in creating an authentic decor. A designer needs in depth knowledge of the material properties in order to portray the decor perfectly. And of course the latest production technology in order to combine perfectly the individual design aspects in your favourite floor.

THE HEALTHY ONE, AS BEAUTIFUL AS NATURE

Avatara Design Floor

Avatara is the healthy living, water-resistant design floor created for real life and living. Its light elastic surface is doubly constructed and thus offers highly effective protection from everyday challenges. At the same time the surface gives you a sensuous look & feel. This is the new generation of mindful living, healthy, natural and robust in every situation.

that's
ME

- **Healthy for you** – no PVC, chlorine, plasticiser or solvents.
- **Beautiful as nature** – virtually repetition-free designs on a par with nature, revealing their beauty over a large surface.
- **Technologically superior** – water-resistant, robust and particularly scratch-resistant.
- **Sustainable and circular** – 100% recyclable and resource-efficient.

good to
KNOW

For Avatara instead of using PVC, we use the new intelligent material Talcusan®. This consists mainly of chalk and silicates and a small proportion of the ecologically safe material polypropylene. Especially interesting: Avatara is one of the few design floors that is certified with the Blue Angel label, the ECO label and the "QNG-Ready" label for the promotion of sustainable construction. And Avatara is available for floating installation or glued down.

Find your way
to the range

Inspiration for you

Avatara looks really natural over a large area because we apply our innovative HD quality digital printing process, with practically no printing repetitions technically speaking. That is why our designers are able to use all the typical wood or stone characteristics to create a convincingly natural looking floor. When seen over a large area Avatara is on a par with the beauty of nature and clearly superior to normal design floors.

Oak Lyra*

Oak Capella*

THE COMFORT FLOOR WITH THE STRENGTH OF THE SOYA BEAN

Sōya Luxury Vinyl Tiles

Our comfort floor lives up to its name. It is agreeably quiet and soft to walk on. Nevertheless, it is still tough. The secret to its robust nature can be found in the material and smart construction. The polymer base makes it easy to care for and water-resistant. With up to 48 hours water resistance in the Comfort SEAL quality. Common to all of them is that we have made vinyl flooring healthy for the home environment, thanks to the smart application of soya bean oil as a plasticiser.

that's ME

- **Healthy living** – bio-based plasticiser made of soya bean oil.
- Trend-setting, large formats in wood and stone and **authentic looks** created by the interplay of décor and surface.
- **3 in 1 system** – your chosen decor is available in different versions catering for every type of building application.
- **Multitalented** – antibacterial, antistatic, safe underfoot and water-resistant and in the Sōya Comfort version even water-resistant for up to 48 hours.
- **DIY or Profi?** Click or glue? Always a high quality version available for your room.

good to KNOW

Contrary to conventional PVC vinyl floors, we do not use plasticisers, containing harmful phthalates. To make our vinyl floors elastic, we use a natural bio-based plasticiser: oil, derived from the soya bean. This is why it fulfils all the criteria for low-emission living.

Find your way to the range

Inspiration for you

There is a wide selection waiting for you. You can create dynamic, trendy floor patterns with the herringbone or chevron formats. Our XXL tile formats will make your room look sophisticated and refined. Do you fancy special wood species? Pine, Elm or Hickory in long plank formats are guaranteed to attract attention.

THE ACOUSTIC SOLUTION WITH SCANDINAVIAN FLAIR

SilentDesign Acoustic Panels

Our SilentDesign Acoustic Panels are not merely sound absorbing elements – they are the expression of your individuality and style. Whether on walls or ceilings, all over or as accents – they open up endless possibilities for you to transform your rooms with a harmonious feel-good atmosphere.

that's
ME

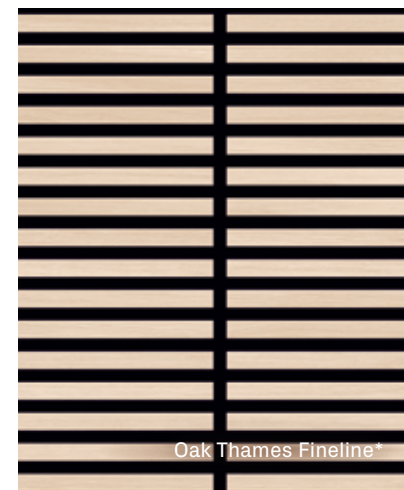

- **1 sided or 3 sided real wood veneered** – choose your preferred wood design – always perfectly crafted on surfaces and edges.
- **UV stable** and easy to care for thanks to the natural oil finish.
- Extra **high-quality, strong felt** 1.800 g/m² achieves good sound insulation – firmly fixed to the wood with metal clips, not just glued.
- **Acoustic panel as functional wall:** with clever LivingWall elements by ter Hürne.

good to
KNOW

You want it really quiet? Installing the SilentDesign Acoustic Panels on a 60 mm or 100mm thick substructure gives clearly better results. You can achieve the best effect with the addition of mineral wool. Thus you can achieve up to 95% sound absorption class A.

Oak Thames Finline*

Inspiration for you

Discover your own creativity with our square 553 x 553 mm formats. When used over the whole surface of the wall a really special structural effect can be achieved thanks to the horizontal or vertical felt joints. The squares are also ideal for creating wall accents. You like room height? That too is possible with our squares. Our panels are available in 2.40 m and 3.00 m lengths. Of course, colour coordinated mouldings are also available.

Walnut Trent*

Walnut Trent* | square

CLEVER FUNCTION FOR ACOUSTIC PANELS IN SCANDI STYLE

SilentDesign LivingWall

Whether as a creative display for your favourite pieces, practical shelf for your scarf, keys or umbrella and at the same time an elegant eyecatcher – your LivingWall has so much to offer. Equipped with shelves, hooks and clever storage solutions it transforms every surface into a place that evokes fascination.

that's ME

- **So practical:** Shelves, hooks, wooden knobs, fixing elements and even a flower pot ring.
- **So enlightening:** Light ideas for the wall with spotlights, wall lights and LED strips.
- **High quality materials:** Powder-coated metal and selected woods.
- **The best quality panels:** SilentDesign Acoustic Panels by ter Hürne.

good to KNOW

The mounting bolt specially developed for LivingWall allows all elements to be positioned anywhere quickly and safely with a simple screwdriver. It is easy to remove and can be used again without damage in a new position. Our system of the acoustic panels and LivingWall is TÜV certified and in many cases can withstand higher loads than specified.

*Find your way
to the range*

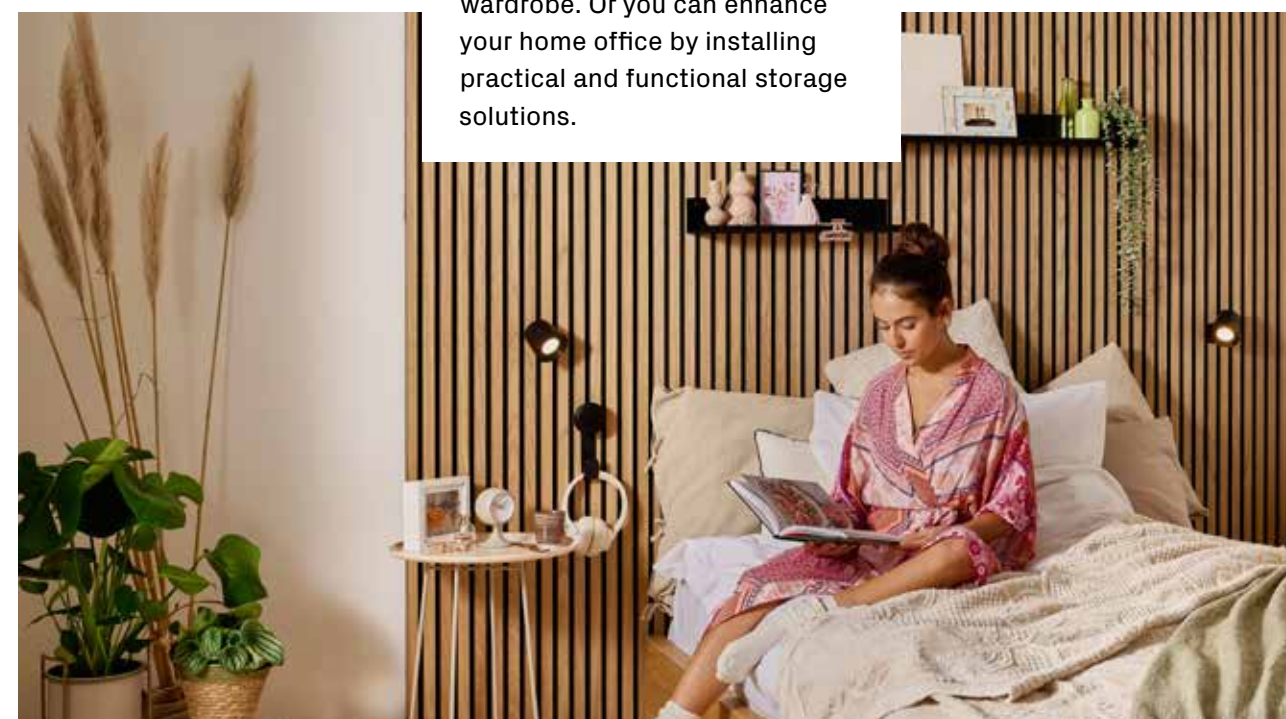

Eirik Cube

Inspiration for you

Bring your wall to life wherever acoustic panels are installed in your home: spotlights in the bedroom or in your favourite reading place. Motion detectors and remote controls will make your lighting system really smart. With shelves, hooks and knobs you can design a stylish wardrobe. Or you can enhance your home office by installing practical and functional storage solutions.

Marta

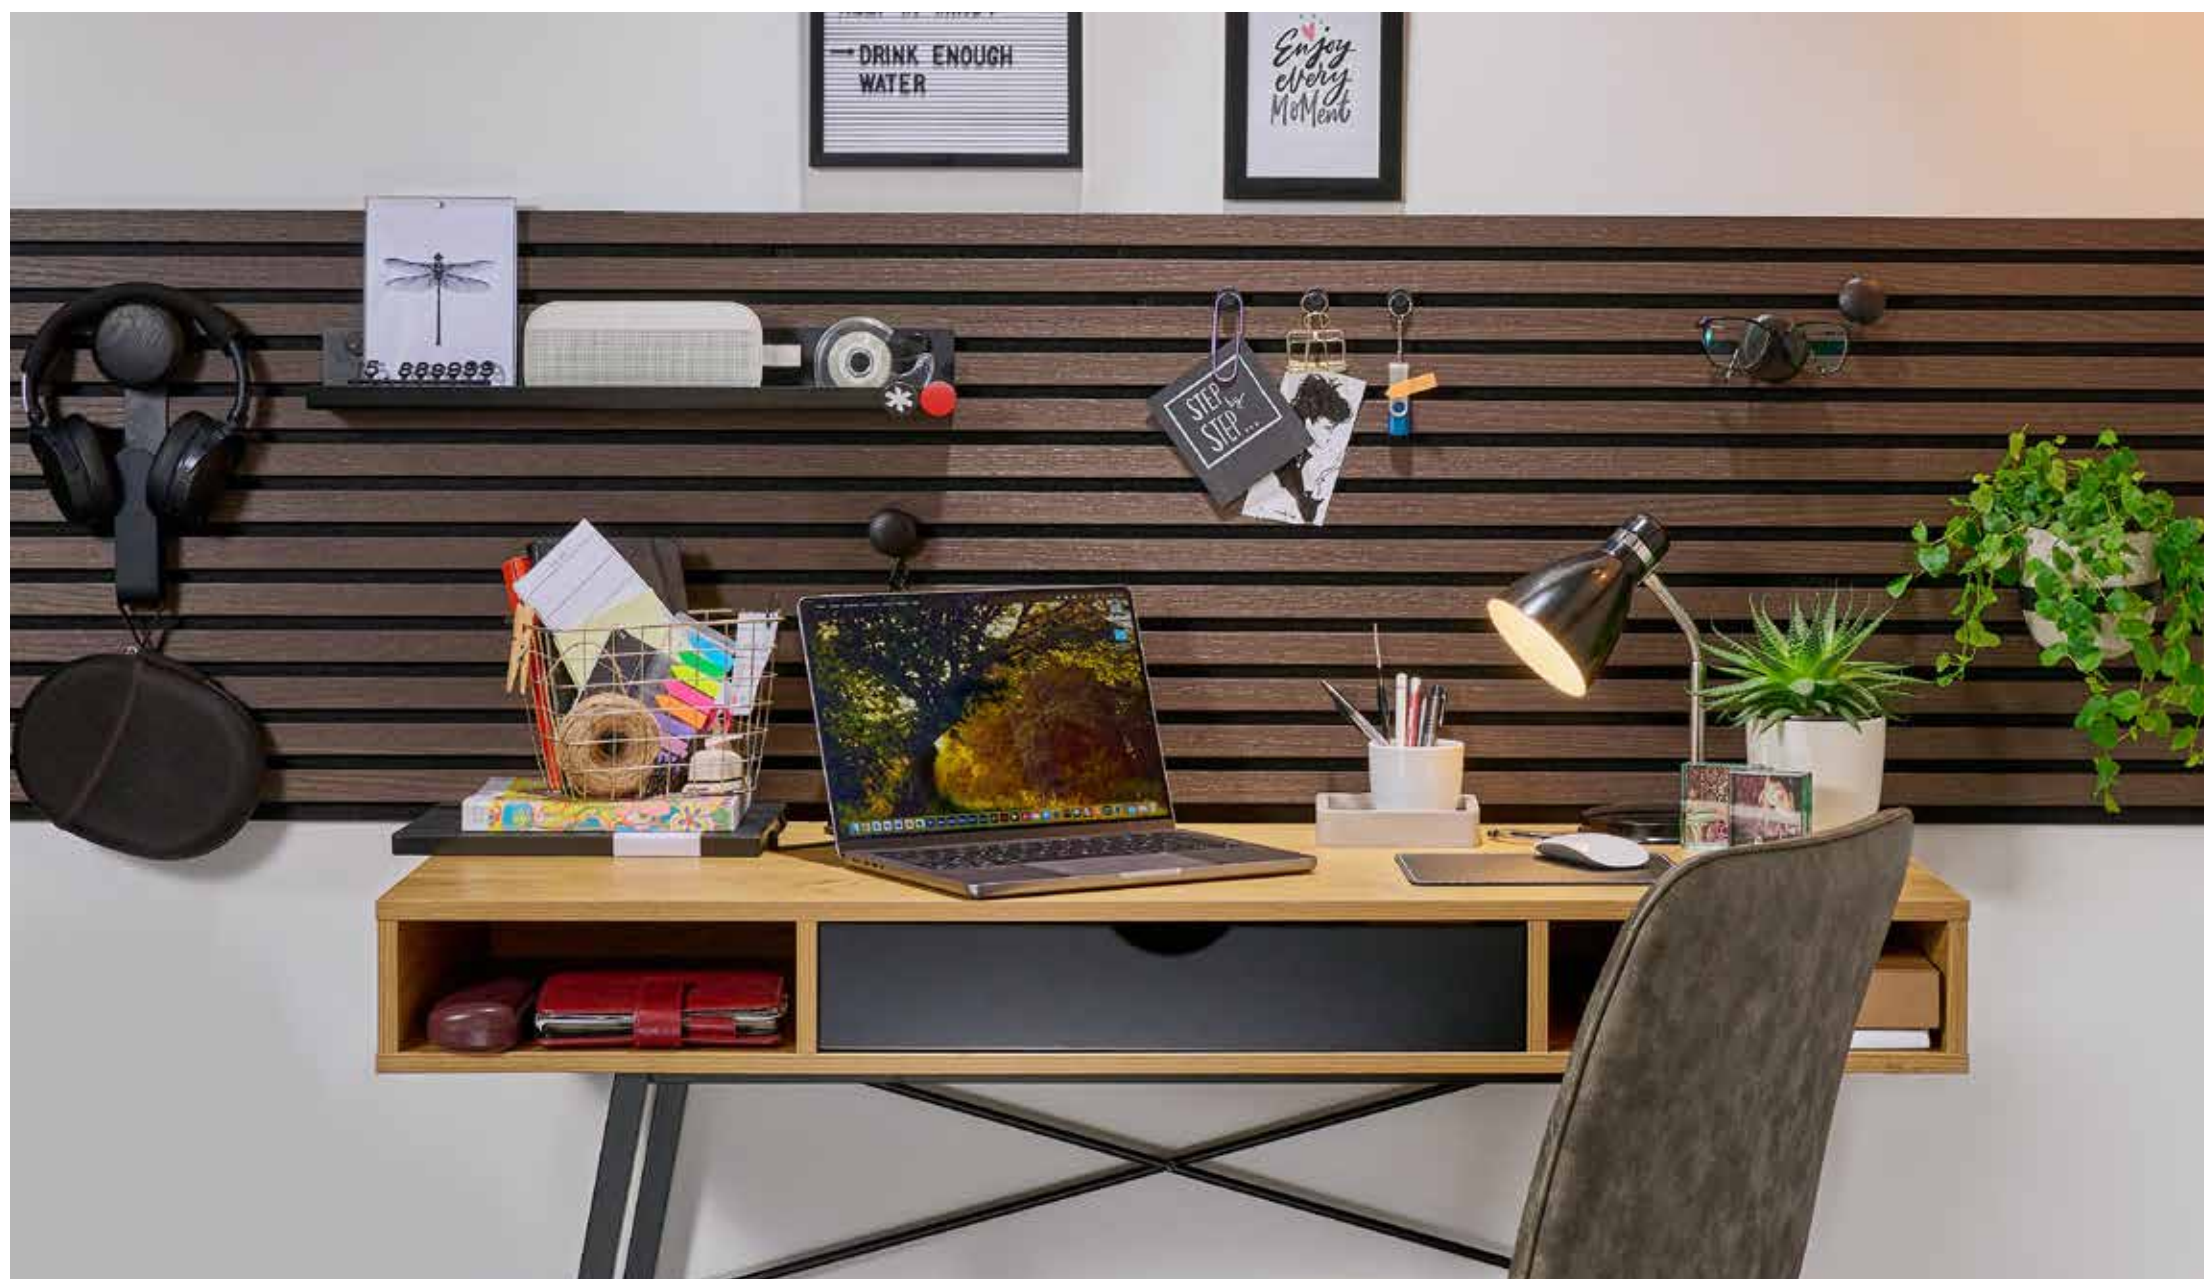

THEY SIMPLY GO TOGETHER

Acoustic Panels & LivingWall

Scandinavian clarity, functional and well thought out –our acoustic panels bring calm to the room together with stylish structure on the wall. The natural wood looks create warmth and lightness – perfect for modern, minimalist interior design. Combined with clever LivingWall elements such as shelves, hooks or integrated lighting elements you can create completely new favourite places in your home.

UniqueDesign Panels

UniqueDesign panels set new standards in terms of aesthetics and functionality. Our product designers have tailored the elegant design elements for wall and ceiling to maximize functionality.

that's
ME

- Such **diversity**: from linear contrasts to natural surface effects – there are so many possible combinations of linear and colour coordinated panels.
- Suitable for damp rooms, thanks to **the swell-protected baseboard**.
- **Quick and easy installation** – saving time and effort.
- UniqueDesign Panels are **really easy to care for** and cleaning is effortless.

good to
KNOW

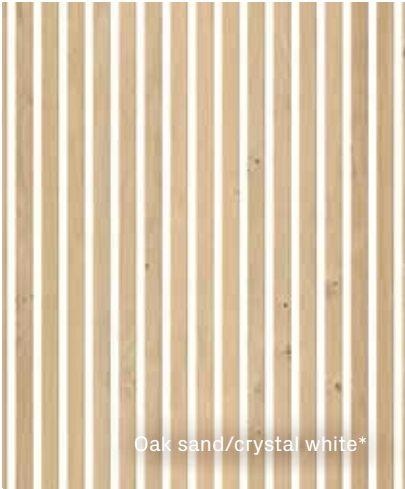

You can also make clever use of customisable panels to design more attractive storage spaces and technical elements, such as TV panels with built-in loud speakers, or made to measure sliding doors with lighting, or practical wardrobe elements. The high quality backing material is suitable for installation in damp rooms away from the splash zone. So they are ideally suited for kitchen and bathroom too.

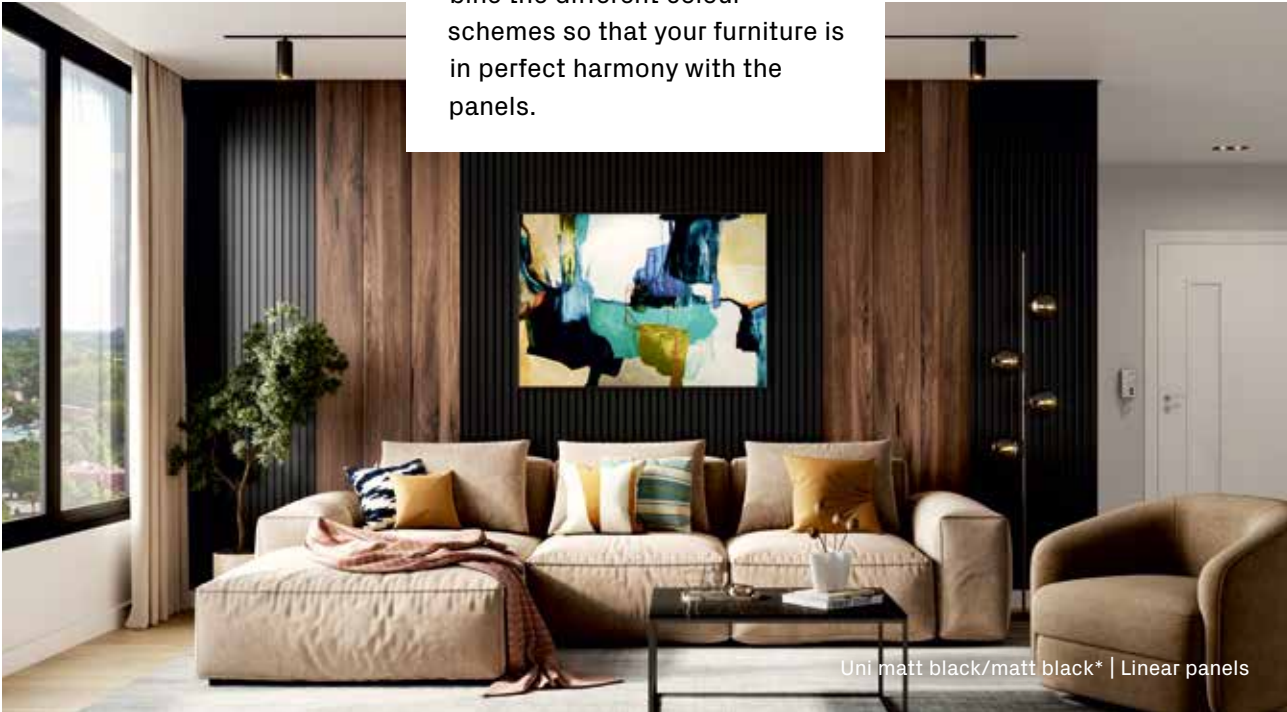

Oak cream beige*

Inspiration for you

How about some contrasts? The ter Hürne Linear and Decor Editions can be perfectly combined, both technically and visually and they create Duo-Looks, that you will love with the mix of smooth surfaces and 3D structures! You can also combine the different colour schemes so that your furniture is in perfect harmony with the panels.
