

WOOD FLOOR DEEP CLEAN

GB Wood Floor Deep Clean – Thoroughly cleaner and stripper for the removal of the residues of old protective films from sealed wood and cork floors. Also suitable for the intensive cleaning of oiled and waxed floors. **Instructions for use:** 1) Cover sensitive surfaces and apply adhesive tape to protect settlement joints and edge profiles. 2) Sweep or vacuum clean to remove coarse dirt. 3a) On sealed floors apply the Wood Floor Deep Clean undiluted with a wide mop. Avoid puddles forming. After soaking in max. 10 min, clean with a white Pad in the Pad Master, covering large areas with the monodisc appliance. 3b) On oiled and waxed floors dilute the Wood Floor Deep Clean, depending on dirtiness, in a ratio of 1:1 to 1:3. Fill the tank of the Floor Boy with this cleaning liquid and, using a green Pad underneath, clean the area. While doing so, always dispense the liquid evenly with the help of the tank. Avoid puddles forming. In case no Floor Boy is available, use the Pad Master with a green Pad. 4) Immediately remove all dirt using a water extractor appliance. In exceptional circumstances absorbent dry wiper mops may be used. 5) Subsequently wipe lightly over the floor with clear water. **Note:** Wood and cork floors can absorb water at the seams and joints and become misshaped as a result (particularly in the case of bleach). Exposure to the product for longer periods of time can lead to the temporary formation of milky white marks and spots. Therefore ensure that the standing time is limited to a minimum. May we also direct your attention to the advice in our Technical Product Information forms. **Ingredients:** <5% non-ionic surfactants, <5% anionic surfactants, perfumes (LIMONENE). Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Keep container tightly closed.

750 ml

= ca. 7–15 m² (depending on level of dilution)
