

PU CLEANER

GB PU Cleaner – A special active cleaner for use on new floors immediately after installation and for the routine cleaning of floors factory-cured with a polyurethane finish as well as vinyl, linoleum or rubber floor coverings treated with PU Sealer. **Instructions for Use:** Cleaning after installation: Remove coarse dirt using a brush or vacuum cleaner. In case of stubborn dirt, dilute PU Cleaner in a ratio of 1:10 (1l to 10l of water), reducing the concentration accordingly for slight soiling. Distribute the cleaning solution over the floor and, after allowing to stand for a short time, treat the floor surface using a Monodisc appliance and red pad or scrubbing brush. Take up the dirt using a Spray extractor fitted with a hard floor adapter or absorbent wide-headed wiper mop and wipe over with clear water to neutralise. **Daily Cleaning:** Dilute PU Cleaner in a ratio of 1:200 (50 ml to 10 l of water) and wipe over the floor using this solution. The concentration can be reduced to 1:400 (25 ml to 10l of water) when using a fully automatic cleaning appliance. **Note:** Sensitive surfaces (such as wood, metal, furnishings) should not be sprayed with the cleaning solution. May we also direct your attention to the advice in our Technical Product Information forms. **Ingredients:** $\geq 5 - < 15\%$ non-ionic surfactants, less than 5% anionic surfactants, perfumes (LIMONENE), preservation agents (2-BROMO-2-NITROPROPANE-1,3-DIOL, OCTYLISOTHIAZOLINONE, GLUTARAL).

750 ml

= 15 applications (daily cleaning)

= 70–100 m² (Cleaning after installation)

UFI: F300-POFE-U00H-G7P6
