

A large, leafy tree with two foxes sitting at its base in a grassy field. The scene is bathed in warm, golden light, suggesting a sunset or sunrise. The foxes are positioned near the base of the tree, looking towards the camera. The background shows a vast, green field and distant trees under a soft sky.

My Natural Engineered Hardwood Flooring

Lived values

Editorial

The floor in your home is much more than just a covering.

It's where your children learn to crawl before they take their first steps. Lego towers are built there and pictures are painted, guests come in and out, not to mention pets. There is no doubt about it: the floor plays a major role in creating a really great atmosphere for your home. And by the way, it just happens to be the largest piece of furniture in the room in terms of its surface area.

At ter Hürne, we know all about the importance of your floor, because our love of wood and its positive, natural properties have formed the basis of our company for more than 60 years. We have made a name for ourselves in the industry as one of the leading manufacturers of engineered hardwood flooring in Europe. Today, we apply all of our expertise to produce innovative floors that are ideally suited to life with all its different requirements, while also protecting the environment.

Healthy living is our key promise to you. Our portfolio in the real wood segment and our natural-looking collections in the wood and design floor segments all have something in common. We do not make compromises in manufacturing: not in the design, the feel, the quality or the function – and certainly not when it comes to healthy living. Throughout the entire process, from the initial concept to product development and manufacturing, all ingredients are designed to have a positive impact on the health and well-being of occupants. With us, living is naturally healthy – and simply beautiful. And that's something you can rely on – no ifs or buts.

HEALTHY AND SUSTAINABLE

With good feeling

Parquet by ter Hürne is the result of our passion for wood. We want you to be able to feel the positive, natural properties of this natural material: as a barefoot floor with an excellently finished surface, as an elegant design highlight - and as a smart natural product that makes you as happy as on day one, even after years of use.

For us, healthy living is our top priority: we make sure that our ter Hürne parquet is good for you. All floors are therefore low-emission, far beyond the legal requirements, and have also won several awards for their healthy living and environmentally friendly properties.

PARQUET IN DETAIL

Your smart home

For us, parquet is more than just wood. Every single parquet element is an intelligent combination of natural components that optimize the floor in terms of everyday suitability, durability and healthy living. This carefully thought-out product design is an essential part of our ter Hürne quality. Discover the perfection of your parquet - smart, robust and good for your home.

Middle layer of real wood

How does the expert recognize well-made 3-layer parquet? He checks the middle layer. This is the support layer, which makes up the largest part of the parquet. This is because indeed we use solid wood staves with so-called standing annual rings in the construction. The advantage of this is that the spruce wood of the middle layer works much less is much more stable if humidity fluctuates. The individual layers of the parquet interact with each other, neutralising any tension forces which occur. This leads to superior dimensional stability.

Clever protection for your floor

Wood and water are not friends. When water penetrates, parquet swells and unsightly raised edges appear. The floor literally comes apart at the seams. Our solution: At the joints of our planks and lamellas, we additionally protect our wooden floor with a healthy and water-repellent emulsion. This makes it much more difficult for moisture to penetrate the wood.

More smart features

PRODUCT INTELLIGENCE

Made smart

- 1 Surface finish
- 2 Real wood top layer (wear layer)
- 3 Real wood middle layer*
- 4 Real wood stabilizing layer*

To the installation film

SINCE 1959
MADE IN GERMANY

* Herringbone planks have tongue and groove PRO connections – The herringbone plank format are always installed glued down.

** Suitable for hot water and electric underfloor heating systems. For electric surface heating systems with gentle warm-up technology and temperature control unit. If heating systems are fitted with re-cooling, they must be equipped with automatic dew point control.

*** A selection of our engineered hardwood flooring is certified fire protection class Cfl-s1. Please contact us if you require further information.

TAILORED COLLECTION: IT'S A MATCH!

3 steps to your parquet floor

Choose your plank design

Plank floors impress with the length and width of the individual planks with bevel. The 3-strip planks create a harmonious, even surface with stave elements without grooves.

Plank

3-Strip

Choose your Colour

Scandinavian fresh or as created by Nature? Find your personal favorite color!

Nougat

Coffee

Unfinished effect

Choose your grade

Expressive with many wood characteristics or rather balanced for a harmonious, calmer floor design. Which do you prefer?

Expressive

Balanced

Your Surface Decision

You can get your dream parquet in a natural oiled or matt lacquered finish - the color tone is the same for both surfaces. But you can feel the difference and see it in the different gloss levels. The two surfaces are equally easy to care for.

Natural oiled

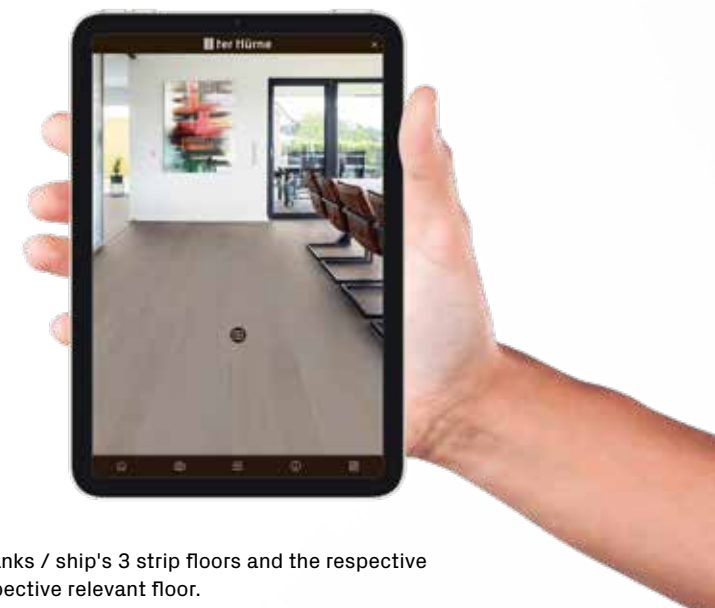

If you prefer a matt look and want to feel the natural structure of the wood the natural oiled surface is the choice for you.

Matt lacquered

The hard-wearing lacquer surface gives the floor a silk matt gloss with a soft feel.

Your dream parquet online

- Three simple steps to your parquet floor
- Compare floors easily
- Install your floor in different rooms
- And much more...

Non-binding colour illustration of the products. The design decision for planks / ship's 3 strip floors and the respective grading decision have a gradual effect on the colour perception of the respective relevant floor.

THE STAIR AND STEP SYSTEM

Simple. Perfect. To the floor.

Our ter Hürne stair and step system continues the room design seamlessly to stairs and steps. And best of all, it's easy, quick and safe to install.

All the benefits at a glance:

- Unique ter Hürne designs are merged with the stairs and steps, for a continuous overall appearance.
- Step profiles are each perfectly matched to all our parquet collections.
- The system is uncomplicated and compact, consisting of only three components.
- Ready-made step profiles can be effortlessly cut to size on site for maximum flexibility.
- Ideal for renovating existing stairs and steps to give them a fresh look.
- The step profiles and floor boards are easy, quick and safe to install with the CLICKitEASY longitudinal connection.
- Perfectly closed step profiles eliminate the additional effort of a finishing profile.

ORIGINAL ACCESSORIES

The big plus

There are so many good reasons to choose a floor from ter Hürne. One of them is that our quality management also perfectly matches the accessories to our collections in our own test laboratory.

“Our experience clearly shows that compromises in accessories are expensive in the long run. Maximum quality and longevity in flooring are always demonstrated in the interaction with the complete system: how does a certain adhesive interact with the floor undertemperature fluctuations? Which underlay material causes material to become fatigued more quickly? We ask ourselves questions like these and others every day in the laboratory and therefore know that choosing a system of proven quality is also the best way to save in the long run.”

4 good reasons why you too should rely on ter Hürne system solutions:

- **Smart:** You get a consistent system for every floor concept, which ensures easy and quick installation.
- **Quality:** The smart ter Hürne system is a guarantee for a floor with maximum quality and longevity. Because all components are perfectly coordinated with each other.
- **Healthy living:** We only use materials for a healthy home environment and, of course, this also applies to the accessories.
- **Visual appearance:** All ter Hürne floors perfectly match our skirting and step systems. This gives you a successful floor concept in terms of appearance.
